# Kiran M K

Software Engineering Student | Full-Stack Development

+91 9740374098 | kiranmk1803@gmail.com | LinkedIn | GitHub | LeetCode

## Professional Summary

Computer Science and Business Systems undergraduate building full-stack applications and REST APIs with Java, Python, React.js, Spring Boot, and FastAPI. Experience in unit testing and Docker-based deployment.

## Education

**BMS College of Engineering** Oct 2023 – Jul 2027 (Expected)

Bachelor of Engineering, Computer Science and Business Systems | **CGPA: 8.6** Bengaluru, India

## Technical Skills

| | |
|---|---|
| **Languages:** | Java, Python |
| **Full Stack:** | React.js, Node.js, Spring Boot, FastAPI, REST APIs, HTML, Tailwind CSS |
| **Databases:** | MySQL, MongoDB |
| **Core CS:** | Data Structures & Algorithms, OOP's, Operating Systems, Computer Networks |
| **Testing & Tools:** | Unit Testing, Git, GitHub, Bash |
| **Cloud & DevOps:** | Docker, AWS, Vercel, Render, Kubernetes (basics) |

## Experience

**Software Developer Intern** Oct 2025 – Nov 2025

*Bluestock | Remote*

- Gained exposure to REST API concepts, including HTTP methods, status codes, and JSON request/response handling.
- Learned backend API testing fundamentals, including endpoint validation and response verification.

**Open Source Contributor**

*GirlScript Summer of Code (GSSoC) | Remote*

- Collaborated with maintainers through GitHub issues and pull requests on documentation, features, and code quality.

## Projects

**MediPulse Pro – Inventory & Expiry Predictor** Source Code | Live Demo

*Java 17, Spring Boot, MySQL (Aiven Cloud), Docker, Render*

- Built a hospital inventory platform with batch-level expiry tracking and stock management across **six wards**.
- Validated first-expiry-first-out (FEFO) prioritization, formula-based reorder logic, expiry alerts, and low-stock recommendations using synthetic data.
- Implemented JWT-based role access and SSL-secured MySQL connectivity; deployed with Docker on Render.

**DSA Logic Builder** Source Code | Live Demo

*React.js, Tailwind CSS, Gemini AI, Node.js, JWT*

- Built a Gemini-powered code explainer for Python, Java, C++, and JavaScript with step-by-step explanations, variable tracking, and boundary-error highlighting.
- Created a seven-step interview-practice learning path covering **100+ questions** and **15+ algorithmic patterns**.

## Research Publication

**Published Research Article** Paper PDF | 2026

*International Journal of Drug Delivery Technology*, Vol. 16, Issue 7.

## Achievements

- **Smart India Hackathon (SIH):** Selected as a finalist after developing and finalizing a project for the competition.
- **College Coding Clubs:** Placed among the top **50** out of **1,000 participants** in college coding-club activities.

## Certifications

| | |
|---|---|
| **Nutanix** – Certified Associate 6 – Multicloud Infrastructure | Apr 2026 |
| **Oracle Academy** – Java Programming Fundamentals | Nov 2025 |
| **Google Cloud** – Generative AI | Jun 2025 |
| **Oracle Academy** – Database Programming | May 2025 |
